Notes

I want from develop upload app for aple store and google play Make notification before finish time add

- The amount and duration of any added part of the control panel is controlled
- Control panel in Arabic and English
- Add users and powers and modify them
- When a user wants to add paid ads he will first transfer the amount and attach Copy the transfer through the Balance Shipping screen
- You can then add an announcement according to the section you want
- When adding any user activated by email
- After the advertiser adds a declaration that is activated only after uploading the image of the conversion and verification

Of them and activate the balance of the advertiser

• When the advertisement is added by the advertiser for a certain period, a message will be issued to the advertiser asking him to transfer and upload the conversion picture in the shipping form to activate the announcement and start the duration of his advertisements
